**the types of trees and hedges and looked at what grows there. We got to feed hens and grow our own vegetables. They had lots of vegetables growing there: turnip, carrots, cabbage and lots more. We got to work with hay and used things that they would've used long before machinery. The history of farming was brilliant. We got to do pond dipping to look for living things and we found freshwater shrimp and louse. Their presence showed the water was healthy. We got to see the many types of sheep and how their face colour tells if it is hardy mountain sheep or not. It was a very interesting day and we all enjoyed it'. Ultán McConnell P6**

## Top Ten Facts for children to tell their Parents & Carers about Bullying.

Normally bullying is defined as having the following three elements: bullying as the repeated use of power by one or more persons intentionally to hurt, harm or adversely affect the rights and needs of another or others.

Bullying, no matter how it happens or why it happens, is always wrong.

39% of pupils in Year 6 and 29% of pupils in Year 9 report having experienced bullying at least once in the previous two months.

There are many possible reasons why children are bullied. For instance, the colour of their skin, their religion, a disability, their sexual orientation, their social status or because they are Looked After Children.

Schools have anti-bullying policies in place as required by the Department of Education and parents/carers should be consulted about changes to the content. Children can be bullied in many different ways e.g. verbally, physically and by being socially excluded. Cyber bullying has emerged as a particularly challenging form of bullying.

Dealing with bullying can be very complicated. A range of strategies can be used by schools, parents/carers and pupils to help everyone involved to end bullying behaviour. For more information see the NIABF website:
